Environmental Consultants

IRELAND'S LEADING ECOLOGY TEAM

Providing sustainable environmental management solutions through technical and scientific excellence for the benefit of conservation, the environment and business

Specialists in the fields of Ecology and Environmental Management

- committed to excellence and customer satisfaction
- providing tailored solutions for projects to minimise environmental impacts

We specialise in Environmental Projects such as **Environmental Impact Assessment (EIA) studies** and have the qualifications and experience to provide assessments of developments such as water supply and sewerage schemes, road building, wind energy and hydroelectric schemes, flood defence, housing, aquaculture and quarrying.

We also provide a wide range of **survey and monitoring services** in relation to water, habitats and protected species.

Ecofact aims to exceed customer's expectations and will ensure that your project meets the highest ecological and environmental management standards.
